

A new and improved VoIP solution

Our VoIP solutions are more affordable than ever before. Simple choices, minimal upfront costs, outstanding rates, and advanced features.

RELIABILITY | SERVICE | LONGEVITY

Cost savings is the number one reason businesses switch from a traditional phone service to VoIP. Most companies that have installed the technology are experiencing complete return on investment within the first year.

But cost savings aren't the only reason to make the switch. VoIP provides unique features, allows you to access calls from anywhere an internet connection is available, and provides valuable call tracking and system management features that can be easily accessed.

VoicePoint for PBX

Voice over IP (VoIP) provides businesses with numerous benefits including improved flexibility, advanced feature options, and cost savings. If you're looking for a more efficient way to utilize your current phone system and don't want an expensive overhaul – then VoicePoint for PBX is the plan for you.

VoicePoint Analog

- Connect your company's PBX or Key system to the Internet.
- Analog service offers the efficiency of VoIP while using your existing PBX.
- Utilizing dynamic bandwidth allocation, one network serves all your voice and Internet needs.

VoicePoint SIP/PRI

- SIP/PRI services use Session Initiation Protocol (SIP) signaling to operate with either an IP PBX or PBX or Key system.
- Route voice calls from your IP-PBX across secure communication paths.
- An easy way to reduce or replace your current system.

VoicePoint Hosted

Our hosted VoIP service, VoicePoint Hosted, gives you the confidence to conduct your business knowing your communications solution is reliable, cost efficient and will transition seamlessly as your company grows.

VoicePoint Hosted

- A feature rich, business class phone system that is flexible and easy to use.
- A single communications platform that delivers voice and data over a dedicated bandwidth.
- Dynamically switch between voice and Internet as your call volume needs dictate.
- The complete business phone system and high-speed Internet solution that provides everything your business needs: all the equipment, installation, maintenance, support, updates and more.
- Significantly improved communications, resulting in higher overall productivity.

Both plans offer unlimited local calling, several features included at no cost, and the ability to consolidate your voice, data and Internet services.
